NOTICE OF TENTATIVE APPROVAL  
NO. PRO/027/008  
DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
IN AND FOR THE STATE OF UTAH

IN THE MATTER OF TENTATIVE APPROVAL OF THE MINING AND RECLAMATION PLAN PERMIT APPLICATION SUBMITTED BY M. C. GODBE, III, GEOLOGICAL ENGINEER, MILLARD COUNTY, UTAH.

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION, MINERAL AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS INTERESTED IN STATE SECTION 32, TOWNSHIP 22 SOUTH, RANGE 11 WEST, SLBM, MILLARD COUNTY, UTAH, STATE IDENTIFICATION #UT860320-020.

Notice is hereby given that tentative approval was given by the Division of Oil, Gas and Mining, on July 22, 1986 to Murray C. Godbe, to proceed with the development of a mining operation entitled "Sevier Dry Lake Project" which will involve facilities in the following locations: A sand and gravel lease has been issued by the Division of State Lands & Forestry which comprises two (2) twenty acre parcels in portions of State Section 32, T22S, R11W, Millard County, Utah. Borrow materials obtained from one twenty acre parcel (NW 1/4 NW 1/4, Section 32, T22S, R11W) will be used to construct a dike across the southern arm of the Sevier Dry Lake affecting portions of Sections 19, 29, and 30, T22S, R11W & Sections 13, 14, & 24, T22S, R12W, SLBM Millard County, Utah.

The name of the person representing the proposed operation is Mr. Murray C. Godbe, III, 1012 Newhouse Building, Salt Lake City, Utah 84111. Mr. Godbe has fulfilled obligations under the Utah Mined Land Reclamation Act of 1975 (Section 40-8, UCA 1953 as amended) with specific reference to Section 40-8-13 and will employ the following mining and reclamation techniques on approximately 40 acres of state and federally owned land.

**During Operations:**

1. The borrow area for obtaining fill material for the dike will disturb 20 acres of state land. From 160,000-180,000 cubic yards of fill will be removed for dike construction. The actual dike construction will affect 20 acres of federal land. An access road will be constructed to access the state leased borrow area and will impact approximately 2.4 acres of new disturbance.
2. The dike will serve as a lake surface water level control structure. Total dike length will be 29,500 feet. The intent is to lower the water level of the southern half of the lake through controlled evaporation. The tentative approval includes the construction of the dike, and disturbance of the borrow area used for fill.

**Following Operations:**

1. Borrow area(s) will be regraded to approximate original contour, no highwalls or banks will exceed a 2:1 (H:V) ratio.
2. Subsoil materials are comparable to the surface soils and will serve as a substitute topsoil medium for final reclamation. Appropriate amendments will be utilized to supplement the subsoil upon final reclamation.
3. Standard agronomic practices will be used to prepare the seedbed for drill and/or broadcast seeding. The disturbed areas will be reclaimed with native vegetative species.
4. The dike will remain as a permanent access route traversing the Sevier Dry Lake bed only if it determined to be stable upon cessation of mining operations. If the dike proves unstable when mining activities cease, based upon joint BLM, DOGM inspection it will be reclaimed.

Any Person or agency aggrieved by this tentative decision is hereby requested to submit written protest within thirty (30) days of the date of publication to the Division of Oil, Gas and Mining, 355 W. North Temple, 3 Triad Center, Suite 350, Salt Lake City, Utah 84180-1203, setting forth factual reasons for his or her complaint, and thereafter, at a time and place to be established, appear before the Board of Oil, Gas and Mining to show cause, if any, why this mine plan should not be approved.  
DATED this 28th day of July 1986.

STATE OF UTAH  
DIVISION OF OIL, GAS AND MINING  
Marjorie L. Anderson
